

Our ref. Nr. 045 / 1st November 2011

REFERENCE

I am extremely pleased to recommend ATE Consult Ltd. to new companies with projects connected with Maritime transport and Ship Management. Over the past few years, I have worked directly with ATE Consult team on the project "Design, development, implementation and maintenance of Safety Management System in Bulmarket Shipping Ltd. in compliance with International Safety Management Code (ISM Code)". Their services and quality of work are excellent, and we have been very pleased with the work they've done for us. As a result we have received positive assessment from Bulgarian Maritime Administration - Document of Compliance for the company and Safety Management Certificate for the ship.

A recent project they have provided consultancy services for design, development, preparation for certification and maintenance of Safety Management System in compliance with the requirements of ISM Code which has resulted in a raise quality of our services.

ATE Consult Team has always been on time and on budget with their projects for our company. I recommend them without hesitation and would hire them again if given the opportunity.

Yours Sincerely,

Stanko Stankov
General Manager

Bulmarket Shipping Ltd.
